

**Innovation tested
and designed for
patients with HIV-
associated diarrhoea**

ColoPlus™

www.coloplus.se

International patent granted

Food product

**Delivers bioactivities in combination
with nutritional support**

ColoPlus

- **is an innovative food product rich in proteins, minerals and vitamins**
- **rich in antibodies and growth factors**
- **provides optimal exposure to the intestine by active compounds**
- **specifically developed to preserve the bioactive components during production and after administration**
- **produced in powder form just to be mixed with lukewarm water**
- **packed in portion sachets for long-term storage**

- **Stops diarrhoea**
- **Improves nutritional status**
- **Decreases fatigue**
- **Increases CD4+ count**
- **Normalizes weight**

Ref: Scand J Gastroent, 2006; 41, 682-686

ColoPlus has been tested clinically on patients with HIV-associated diarrhoea in Nigeria and Uganda

- ▶ **can with advantage be used as supporting nutrition for immune-compromised persons**
- ▶ **recommended for intake 1-2 times a day after consultation with your health care adviser**
- ▶ **offers a long-lasting effect for maintaining quality of life**

Content: Bovine Colostrum*, Rice, Banana, Sugar, Maltodextrin

*Bovine colostrum is the "pre-milk" that cows secrete immediately after parturition, prior to producing mature milk. Bovine colostrum is a complex fluid rich in nutrients and is characterised by its very high level of several bioactive components: immunoglobulins, especially IgG₁, growth factors, especially IGF-1 and TGF- β 2. Lactoferrin, lysozyme and lactoperoxidase are other antimicrobial components of colostrum.

Produced in Sweden
